**ANNUAL
BULL SALE**

28 Yearling & Long Yearling Charolais Bulls

Setting the Standard!

March
2025 

**1:30 pm • Renfrew Pontiac Livestock
Cobden, Ontario**

Blackbern Farm • WhiteWater Livestock

-Sale Information-

AUCTIONEER

Stewart James 613-445-3269
Stewart James Jr. 613-222-2815 (bilingual)

SALE DAY PHONES:

Keith Black 613-570-8464
Kurtis Black 613-585-3873
Tyson Black 613-433-1169
Matt Dick 613-633-1598
Jackie MacGregor 613-585-5055
Nathan Latchford 613-281-1477

SALE TERMS

- Bulls sell under Standard Terms & Conditions of the Canadian Charolais Association.
- Please make all settlements immediately after the sale.

BULL HEALTH

- All bulls will sell with a semen check and vet examination to ensure that you are purchasing a quality herd bull.
- All bulls marked as homo-polled have been verified by DNA testing.
- Additional performance data will be available on sale day.
- The Blackburn and WhiteWater herds are vaccinated using the Bovishield Gold Live vaccine protocol, and the bulls will also have received their blackleg booster shot.

DELIVERY

- Please see the seller if you require delivery after the sale. Shipping arrangements will be at the convenience of the seller, but will be as soon as practical after the sale, at the buyer's risk.
- We will keep bulls until April 30 free of charge. As of May 1, a boarding fee of \$5.00 per day applies. We are not liable for the bulls after the sale and ask that you insure any bull returning to the farm.

INSURANCE

Will be available on sale day
Nathan Allen 705 924-2632
Allen Insurance Group

ONLINE BIDDING

Those unable to attend the sale will be able to view and bid online with DLMS.

CHAROLAIS JANUARY 2025
BREED AVERAGE EPDs:

BW 0.4 WW 59.5 YW 109.6 M 22.3 TM 52.0

PERFORMANCE DATA DEFINITIONS

BW = Actual Recorded Birth Weight
AWW = 205 day Adjusted weaning weight
AYW = 365 day Adjusted yearling weight

Welcome Everyone to Our 14th Annual Bull Sale!

WELCOME to our 14 th annual bull sale!

Thank you to everyone who is taking the time to look through our catalog and to our valuable customers who support us year after year. Your business and friendship are greatly appreciated.

As we all know the cattle market is in a better place than we could have ever imagined even a year ago. With demand as high as ever for all classes of cattle there has never been a better time to invest in new progressive genetics that will add performance and profit to your calf crop!

This year's group of bulls is certainly our best yet, with a few new sire groups including NGC Capitalist and WCR Bold Move, as well as, the time proven sires of WhiteWater Justify, Turnbull's Equipped and Silverstream Padra. There will be bulls that will fit everyone's breeding goals and budgets. These bulls are bred to perform and fed to last!

We encourage everyone to view the bulls at Blackburn Farm prior to sale day to see them in their everyday environment. The bulls were pictured in early January so they will have grown and matured a lot between then and now.

For those that can't make it to the sale in person you can bid with confidence throughDLMS. If you have any questions about online bidding, please don't hesitate to contact us or the DLMS team.

We invite everyone to join us Saturday March 8 th in Cobden for a great display of bulls and to visit with cattle producers and friends alike. Lunch will be served starting at 11:30 and the sale will begin at 1:30!

Sincerely,
The Black's

Kurtis and Chelsea Black
& Family

Tyson, Karen & Keith Black

BIRTH WEIGHT & CALVING EASE

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions:

1. The birth weight itself influences calving ease by 65%.
2. The female has 60-70% influence on birth weight of her calf.
3. The bull has 30-40% influence on birth weight of his progeny.
4. Pelvic measurement and angle as well as the shape of the calf have 35-40% influence on calving ease.
5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the in the last days of gestation.
6. Weather and temperature the last 30 days affect the length of gestation.
7. Size and maturity of the cow influence calving ease.

Most commercial producers do not take birth weights. Guessing is as inaccurate as driving with a broken speedometer – what's thought to be 55 mph may in fact be 65 or 70 mph, and what's thought to be 70-80 lb may actually be 80-90 lb.

Remember, everything is relevant. Increased growth, frame and performance will increase BW. A longer bodied calf will weigh more. If a calf is expected to have genetics for growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lb at birth to finish at 1200-1250 lb. A cow should easily give birth to a calf weight 8% of her own body weight. Thus a 1200 lb cow should give birth to a 96 lb calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

Thank You To Our 2024 Bull Sale Buyers!
